Protect Your Hard-Earned Savings

THROUGHOUT Canada, life insurance policyholders and beneficiaries should realize the menace to their own and the national welfare that lies in extreme and unjust legislation.

These policyholders represent 50 per cent. of the electors—federal and provincial. Through the institution of life insurance, they have so pooled their resources that their collective interest can withstand attacks that would bring financial disaster to the individual.

Despite war, epidemic, panic and depression, life insurance has met every policy obligation promptly and in full.

Despite the financial disturbance of the past six years, it has distributed, and continues to distribute, to its policyholders and beneficiaries, over \$500,000 every working day.

Seventy-five per cent. of this money has been, and continues to be, paid to living policyholders; the balance to beneficiaries.

Life insurance is the greatest co-operative business in Canada. No one doubts its strength and stability. No one questions the prudent and intelligent direction of its affairs.

It is the guardian of the hard-earned savings of 3,500,000 men and women in all walks of life.

Today there are forces in Canada that menace the welfare of these people. These forces would penalize their savings and impair their investments through legislation which cancels public and private debts—regardless of the debtor's ability to pay—and which tends to destroy the ownership of public and private property.

The interests of life insurance policyholders and beneficiaries—as of all other citizens whose savings are invested in one form or another in Canada—demand that promises to pay be observed, when the debtor is able to pay; that hard-earned savings which safeguard the homes and families of the Dominion be protected from unjust legislation.

Life Insurance

Guardian of Canadian Homes

The Curlers' Annual Meet.

An enthusiastic meeting of some twenty members attended the annual meeting of the Stony Plain Curling Club, in the town hall on Nov. 18th.

The election of officers for the ensuing season resulted as follows:

Geo. J. Brian, President
F. W. Yeats, Vice-President
W. E. Lewis, Sec.-Treasurer
Executive—Dr. Oatway, J. W. McCulla, A. M. Cumming,
Wm. Goebel, Carotaker.

Fees will remain at the same scale as last year.

Affiliation with the Alberta Curling Association was voted on favorably. This will include both ladies and gentlemen.

The lady members of the club feel that the male members should now be numerically strong enuf to stand on their own legs from now on. Accordingly, they have decided to form their own organization, and to again commence curling in the afternoons. Appreciation of their past help and co-operation was voiced at the meeting. Good luck, Ladies! We hope to meet you again in the "mixed."

Flooding operations at the rink have already commenced, and by the end of another week lots of 'em will be "rarin' to go."

They tell us Spruce Grove have a rink this year that will "knock 'em all over."

For the first draw in the Provincial Vice-Pres. competition the following skips were appointed:

Yeats Lewis
McCulla H. Oppertshausen
Oatway G. Oppertshausen
Hoffman Bryan

To Turkey Shippers.

The following letter has been received from W. F. W. Hancock, commanding "K" Division, RCMP Edmonton:

Editor Sun—I embody herewith copy of a letter received from the Chief Constable, Vancouver, and would appreciate it if you would kindly give this matter your attention and space in your paper.

"During the Christmas season complaints often come to hand from farmers who have forwarded consignments of turkeys, etc., to firms in this city, in response to press advertising and mail circulars, offering exceptional prices and other inducements.

"The ultimate result in many instances is that the farmer receives practically nothing.

"New firms arise and others have a change of name each year for this seasonal trade.

"As the protection of the farmer is of paramount importance, I would request your assistance in the matter by careful checking, before publication, of advertising of this nature emanating from Vancouver."

Friday's 3-Act Comedy.

The Amateur Theatrical Troupe, from Edmonton, presented its annual play, a three-act comedy, here on Friday night last. The affair was under the auspices of the C. W. L., and the title of the play was "Here Comes Charlie." Each played his (or her) part in an excellent manner. The dance was well patronized.

Japan In China

The atrocities committed, not only upon combatants but upon civilians—men and defenceless women and children slain by the Italians in the recent conquest of Ethiopia, and in the present day by the Japanese in an undeclared war of ruthlessness and horror with the Chinese as their victims, have aroused wide indignation and protest in the civilized countries of the world.

So widespread is this indignation over the atrociousness and ferocity of the Japanese onslaught in China that the rank and file of the people in such countries as Great Britain, the United States and Canada are searching their minds for feasible and effective steps which might reasonably be taken to bring to a speedy end the terrors of the Sino-Japanese conflict.

Doubtless if some effective measure could be devised to put a stop to this horrible slaughter of innocents in the Orient, without serious danger of precipitating another widespread world war in which their own countries would almost inevitably be involved, the people of these democratic countries would not be slow in urging their governments to take the necessary steps.

But there is real danger of a general debacle if one or two countries should attempt to impose measures which would be really effective in the Far East and it is this knowledge which makes the problem such a difficult one for Statesmen to handle. Undoubtedly the Japanese are fully aware of the complexities of the situation from the viewpoint of the democratic Occidentals and are taking full advantage of the situation.

In the meantime, people on this continent are doing what little they can to voice their righteous wrath and indignation by passing resolutions expressive of horror and indignation and by agreeing themselves to impose sanctions in a mild form by way of a boycott of Japanese goods, but the extent to which such measures can have a restraining influence on the conquering Japanese is open to doubt.

While Japan's proclaimed pretext for invasion of Chinese territory is fear of the rise of Communism in a close neighboring country, the real reason is the necessity for finding sources of raw materials and creating markets for rapidly expanding industrialism in a country whose population is growing at the rate of a million a year. In a nutshell, commercial gain is the motive.

But as pointed out by R. T. Barrett in *The Fortnightly* of London, England, Japan could have achieved these objectives in China without embarking on a "militaristic campaign of almost unparalleled ruthlessness if she had attempted to secure concessions through diplomatic channels. Stating that Japan had aroused admiration in China by her achievements, Mr. Barrett says that Japan "has many friends in the Republic and could obtain the mineral and railway concessions that she wants if she would abstain from military coercion and work upon the assumption of political equality between the two nations. She could even get, in due time, favorable tariff rates for her goods and be accepted as China's tutor. Her natural advantages in competing for the trade of China would make her commercially irresistible, once she had secured Chinese friendship."

Instead of choosing the civilized method of gaining her goal, however, Japan decided to wrest what she wants from the Chinese by barbaric methods and in so doing is earning for herself, not only the ill will of 400,000,000 Chinese with the threat that may entail in the years to come, but the aversion of the people of many other countries of the world.

For the time being at least Japan's resort to arms appears to have brought success. She has already acquired control over a large slice of Chinese territory and her materialistic gain to date is probably enough to far outweigh in her mind any losses which may be sustained as a result of boycotts waged against her merchandise in the Occidental countries. The mental attitude which permits the Japanese to make unprovoked war on a neighboring country and in the fashion in which it is being carried out will probably result in the widespread ill will which she is incurring in other parts of the world being regarded as of no account.

But there is another aspect to the indignation which has been aroused by Japanese aggression and methods in China that is at least encouraging and this is aptly pointed out by Brooks Atkinson, dramatic critic of the *New York Times*, who stated in a recent article in that newspaper that "the moral standards of internationalism have been steadily improving. Unprovoked conquest for gain is to-day universally condemned. In spite of prevalent forces of evil we are not living in a period that is spiritually dead. When there are no cries of 'shame', the time will have come for lamentation."

Test Was A Success

Television Broadcast From London Received By Liner At Sea

Successful reception of television broadcasts by a liner at sea was reported by Captain A. T. Brown of the Cunard White Star liner *Britannia*.

Captain Brown said the experiments, believed the first of their kind ever attempted, were performed Oct. 29, 30 and 31 after the ship sailed from London.

The experiments were conducted by engineers of the British Broadcasting Corporation, who set up their receiving equipment in a vacant cabin. Captain Brown said the *Britannia*, until it left the English Channel, was never more than 30 miles off shore.

"The pictures were extraordinarily clear, and the sound was perfect," he said.

"They broadcast special programs from Alexandria Palace, in London, and the reception on the ship seemed excellent."

"The pictures were reproduced on a screen about 10 by 12 inches. It was as distinct as if they'd been sending it from the next cabin."

Plants Imitate Stones

In dry sections of Africa, where no rain falls for a year or more at a time, tiny plants grow and thrive on the rocky, sun-parched soil. By imitating the stones, they are un-molested by birds and beasts. Even the colors of the plants vary, always matching the particular type of surrounding rock.

Coal deposits of Alaska are estimated at about 19,000,000,000 tons.

When You Fall Asleep

Different Parts Of The Brain Go Into Slumber Separately

When you fall asleep, different parts of the brain go into slumber separately, like the successive winking out of lights in a closing office building.

The discovery, made with electrical tests, was reported in *Science*, the journal of American scientists. It was made by Dr. Halliwell Davis and P. A. Davis, of Harvard, and A. L. Loomis, Dr. E. N. Harvey and G. Hobart, of the Loomis Laboratory, Tuxedo, N.Y.

Electroencephalograms—the currents of a few millionths of a volt that flow from the head—were used to test the oncoming of sleep. Pezized electrodes pasted to the head picked up these currents.

The electrodes showed that some parts of the brain "shut down for the night" ahead of others. The shut-down was apparent by a drop in the amount of electricity coming from that part of the brain. The flow became irregular and intermittent.

These electrical changes showed up at the point where the would-be sleeper felt the sensation of "floating." The electrical brain power houses, when deep sleep came, were all reduced to a trickle of electricity.

As far back as 3800 B.C., Babylonians had maps which were based on land surveys and which were used for purposes of taxation.

During 1934, British railroads carried 64,000,000 passengers more than the preceding year.

Starting Chinchilla Farm

Woman Animal Fancier In Alberta Purchases Two Animals

Two chinchillas, the little South American animals whose pelts are made into \$100,000 coats, have been purchased by Mrs. Irene Williams, an animal fancier of Cardston, Alberta. She and her husband, a dentist, bought them for \$3,200 during a vacation trip in California.

Mrs. Williams, who has had previous experience with mink, muskrat and silver fox, intends to construct a modernly-equipped chinchilla farm before next spring and care for several hundred.

The chinchillas are descendants of a group brought from Chile a wind-swept Andes by an American engineer 10 or 12 years ago. So elusive and scarce were they that it took the engineer twenty years to capture 11. Descendants from these now number about 1,250.

The pair obtained by Mrs. Williams are the first brought to Alberta and the second to be imported into Canada.

ALICE STEVENS' RECIPES

TRY THESE TASTY BUT INEXPENSIVE DESSERTS

Ill health is expensive. In many cases it can be avoided by eating proper foods. This does not mean that expensive foods are required. Often the cheaper foods are higher in food value. Milk is one of the best. Fruits are also valuable and apples are among the most important fruits.

Fruits are much better than medicines in maintaining healthy bodies. Why not let a good supply of apples stored in the cellar take the place of the medicine cabinet?

Apples stimulate the appetite because they require chewing. This increases the flow of the gastric juices in the mouth. This in turn stimulates the flow of the other digestive juices. To have all the digestive juices flowing freely is the secret of good digestion.

Milk and fruits should be used frequently as the basis of desserts. After the heavier main course of the dinner, a light dessert completes the meal. These desserts can be prepared very quickly and are always popular with the family.

Do you find it difficult to plan the dessert and would you like to try out additional recipes? Try this recipe and write me for another new dessert recipe. It will be sent you without any charge and I think your family will like it.

TASTY DESSERT

- 1 cup flour
- 2 teaspoons baking powder
- 1/2 teaspoon salt
- 1/2 cup sugar
- 1 egg
- 1/2 cup milk
- 1 1/2 cups sliced apples
- Cinnamon
- 3 tablespoons butter
- 1/2 cup brown sugar

Mix the flour, baking powder, salt, sugar, egg and milk. Beat for two minutes. Four into a shallow pan. Top with apples and sprinkle with cinnamon. Mix butter and brown sugar and spread on top. Sprinkle with spice. Bake in a moderate oven 25 minutes. Serve warm, with plain or whipped cream.

DUTCH APPLE CAKE

- 2 to 3 apples
- 1/4 cup sugar
- 1 tablespoon butter
- Cinnamon or nutmeg
- 2 cups flour
- 4 teaspoons baking powder
- 3 tablespoons shortening
- 1/2 teaspoon salt
- 1/2 cup milk

Mix and sift the flour, baking powder and salt. Rub in the shortening. Add the milk. Roll out the biscuit dough, having it from 1/2 to 1/4 inches thick.

Peel and core the apples. Cut them in thin slices. Press into the dough. Sprinkle with sugar and spice. Dot with butter. Bake.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg, Newspaper Union, 170 McDermott Ave. E., Winnipeg, Man.

Georgia, in 1770, passed a law making teaching slaves either to read or write an offense punishable by a fine of \$500 for each offense.

Making Success Of Farming

Requires Greater Diversity Of Knowledge Than City Work

The idea that "any fool can farm"—successfully—is in some minds, but it is a tragic myth. The man or woman who hopes to make a success of life in the country districts and on the land must have a greater diversity of knowledge than the person, who makes a success of his or her affairs in urban communities. Indeed, the person who knows little or nothing about land activities is astonished to discover how resourceful even farm children are and the multitude of things they can do before they are well into their teens.

Certainly, if we are to have an expansion of successful farming in this province, the old idea that "any fool can farm" must be driven from the minds of some in official circles.—Halifax Herald.

Dousing A Poet

Author Of Gray's "Elegy" Had A Nervous Dread Of Fire

A fire, happily not very serious, at Peterhouse, Cambridge, recalls a story of the poet Gray. Like David Copperfield's aunt, the author of the "Elegy" had a nervous dread of fire, and when at Peterhouse, finding his room was on the top floor, he rigged up some iron bars (still to be seen) and kept a rope ladder in readiness for emergencies. Discovering this, some of his fellow-colleagues could not let pass such an opportunity for ragging. One night a sudden cry of "Fire! Fire!" caused the poet to rise hastily and scramble down his ladder—to land in a large tub of water placed in readiness by practical jokes. After which it was not surprising that Gray migrated to Pembroke.—Manchester Guardian.

These Vegetables Travel

Come Back To Be Sold Where They Were Grown

Writing in the *London Spectator*, Sir William B. Thomas notes a curious circumstance connected with a "harmless hamlet" with which he is familiar. The hamlet lies on the edge of Bedfordshire.

When the people of the hamlet want vegetables they go to the greengrocer. The greengrocer gets his supplies from a semi-wholesaler who lives eight miles away and circulates his lorry twice a week. The wholesaler, in turn gets his vegetables from Covent Garden, and Covent Garden gets a good many of them from Bedfordshire, just beyond the doorstep of the "harmless hamlet."—Vancouver Province.

Mr. Scheerer (about to sing):

"What's your favorite air?" Friend (making for door): "Fresh and plenty of it."

Only Recipe For Peace

Loving Your Neighbor As Yourself Says Sir Evelyn Wrench

The Kellogg-Briand Pact, designed to establish amity among nations, failed because world nations were "further advanced than they actually were," Sir Evelyn Wrench, founder of the English Speaking Union, said in an address at Toronto.

"After 25 years of travelling about the world," he told the Ontario Branch of the Union, "I have come to realize that the only way to save humanity is to put into effect the simple doctrine of the Founder of Christianity—love thy neighbor. 'During my travels on this great continent I have often paused to think what a wonderful thing it would be if we could find such brains as those that built the great San Francisco bridges and shoved Canada's railways through the Rocky Mountains, to pound out on the anvil some political instrument to join the nations of the world.'"

The Spirit Of Optimism

Having Confidence In Your Town Or City Is Important

The spirit of optimism goes a long way with all of us, says the *Guelph, Ont., Mercury*. To have confidence in the future of the city of your residence, of your Province, and of the nation is of vital importance. There is no room for the joy-killers in business or public life. A nation of pessimists cannot succeed in anything. This is the time to look forward to what shall be, with assurance that the future is largely what we make it, and that spirit will soon be reflected in all industry when it dominates our daily life.

Protect Food In War Time

British House Of Commons Told Of Plans For Safeguarding Food

Oliver Stanley, president of the Board of Trade, told the House of Commons that plans for safeguarding and controlling the supply and distribution of foodstuffs in time of war "are being prepared by the food department of the Board of Trade in consultation and co-operation with representatives of food importers, manufacturers and distributors."

In 1832, Congress commissioned Horatio Greenough to execute a statue of Washington; thus making him the first American sculptor to be employed in the Capitol at Washington.

Gold is alloyed with baser metals, but platinum usually is alloyed with a still more precious metal, iridium.

Old motion pictures are sold for the silver which can be recovered from the emulsion on them.

And Far Handier Than Older Ways!!!

Here is the most useful waxed tissue package you've ever seen.

This new pack contains 45 sheets of silver white waxed tissue. Through the top of the pack is a metal eyelet for hanging on the wall. Inside, the tissue is held in an ingenious grip so that you can withdraw one sheet at a time by simply reaching out with one hand.

"Presto-Pack" thus becomes the handiest of all kitchen aids. You will wonder how you ever managed without it.

SUNDAY SCHOOL LESSON

NOVEMBER 28

CHRISTIAN FRUITFULNESS

Golden text: Herein is my Father glorified, that ye bear much fruit; and so shall ye be my disciples, John 15:8.

Lesson: John 15:1-16.
Devotional reading: Galatians 5:15-25.

Explanations and Comments

Christ the True Vine, John 15:1: I am the true vine, and my Father is the Husbandman: If a branch be dead which beareth not fruit, it shall be cut away, and every branch that beareth fruit, he cleanseth (pruneth) by it, that it may bear more fruit. By "fruit" Jesus means character, conduct, service. Useless and fruitless branches are cut off, to ensure the great fruitfulness of those that remain, and from the fruit-bearing branches the superfluous leaves are removed so that no sap may be wasted. It is thought that there is a reference here to Judas and his separation from the little group of true followers. Such a kind of pruning has been necessary many times in the history of the church through the centuries.

The Blessings of Fruitage, verses 7-11: If ye abide in me, and my words abide in you (this is the condition), ask whatsoever ye will, and it shall be done unto you. Prayer will be granted which is in harmony with God's will, and those who are abiding in Christ, who are one with Christ, in whom Christ's words abide and are obeyed, will ask for nothing that shall be refused. "The consciousness of abiding is less important than the evidences of it."

Friendship with Christ, verses 12-16: This is my commandment, that ye love one another, even as I have loved you. It is not affection in the sense that we usually use the word, whether lukewarm or passionate, but Christ bids us feel for others. It is the will and the effort that he bids us exert in seeking the welfare of others. Even as I have loved you; Christ came to seek and to save.

Cabinet Minister At School

After Entering Politics Irish Peer Took Up Carpentry

The distinction of having gone back to school after he became a cabinet minister belongs to Lord Charlemont, who has just resigned his post as Ulster's minister for education owing to ill-health. He has always been fond of working with his hands, and soon after he was appointed he took a course of carpentry in one of his own schools, partly to improve his own skill and partly to obtain a closer knowledge of how technical schools are run, comments the News of the World. In addition to woodwork, his hobbies are drawing, fly-fishing, and music. His title goes back for over three hundred years.

Smallest English Inn

People From All Over World Have Visited Smith's Arms

Coming Events, London, says the smallest English inn has recently been sold by auction. It is the Smith's Arms, in the Dorsetshire village of Godmanston. Built in the sixteenth century, it was until sixty years ago a blacksmith's forge. It has a thatched roof, and measures about 20 feet by 10. Its chief drawback, in the eyes of the villagers, is that there is not enough room in it to play cards! The Smith's Arms receives visitors from all over the world.

Edison Memorial Bulb

Is Now Gleaming Beacon On Tower In New Jersey

The giant electric light bulb 14 feet tall, which glows as a land beacon atop the \$100,000 Edison Memorial Tower at Menlo Park, New Jersey, was completed by the Corning Glass Works.

It took a crew of expert glass-workers eight months to complete this emblematic diadem for the tower the task of laying the model out into curved "orange-peel like" sections consuming the greater part of the elapsed time.

The 150-foot beacon will commemorate the invention of the incandescent electric light by Thomas Alva Edison, who in 1879 sent a rough sketch of his idea to Corning, asking that a bulb of glass of definite dimensions be blown.

This original glass bulb, enclosing Edison's carbon filament became the world's first practical electric light. Corning's contribution to the memorial commemorating the event is likewise notable since the 14-foot bulb is the first globular cast job in the history of the glass industry.

In preparing the bulb for shipment more than 6,000 pounds of amber-tinted Pyrex glass were fitted over a steel skeleton fashioned in a Bronx iron works and shipped to Corning. The bulb itself consists of 164 pieces of cast glass in a two-inch diamond pattern and is 14 feet, six inches in diameter. The combined bulb and steel skeleton weigh six tons.

When finally set up the giant bulb was transformed into a gleaming tower at night, casting its rays for miles about the surrounding Jersey countryside. The inside of the bulb is outfitted with 960 incandescent electric lights with a 24-inch reflector to be utilized as an airplane beacon.

The steel frame work of the tower, which is enclosed in concrete and limestone was first erected in 1929 on the exact site of the work bench at which Thomas Edison labored over his first incandescent light bulb just a half century before.

A model bulb enclosed in a glass case was installed in a base of the tower and was linked with current from four independent sources so that its light would never be extinguished.

When a bolt of lightning struck the tower last August, a mass of tangled steel and scaffolding fell to the ground. The glass case enclosing the bulb was shattered and buried in debris but the bulb itself was left unbroken and the light was found still burning. This model bulb was also made at Corning.

Great against any future electrical storms the present structure has been fitted with stainless steel lightning arresters and has been tested against wind velocities up to 230 miles per hour.

The memorial, the gift of William Slocum, president of the Thomas Alva Edison Foundation, who provided for the erection of the concrete shaft in behalf of the Edison Pioneers, an organization composed of past and present Edison Company employees.

Snakes In Alberta

Battlers Said To Infect District In Southeastern Part Of Province

Snakes in the Comfrey district of southeastern Alberta have displaced sports as a topic of conversation for the winter's "hot stove" league members.

Hundreds of rattlesnakes infest the district and many residents relate tales of narrow escapes.

The past summer was the worst season for snakes in the history of the district, first settled 28 years ago. Mrs. P. M. Stevens pulled up a dumb waiter in her kitchen. Coiled around the front was an extra large snake. Her sons came to the rescue and shot it.

Mrs. M. Nicholson was enjoying a rest on a veranda chair, suddenly she felt something around her feet. It was a small rattler.

The "snake year" recalled a narrow escape Percy Stevens, a farmer, had some years ago. Percy was out stoking in a field when a huge rattler fastened on his trouser leg. He jabbed at it with his pitchfork and failing to dislodge the snake, he just "stepped out" of his trousers and fled.

WORLD HAPPENINGS BRIEFLY TOLD

Increases of from two to three shillings will be made in the weekly allowances to unemployed in Great Britain this winter. Rising cost of living is the reason.

A London hotel chef has been loaned to the monks of Buckfast Abbey to advise them how to obtain the maximum of efficiency at a minimum of operating cost.

Sir Robert Hodgson will be the first British agent to insurgent Spain. Announcement of his appointment was officially conveyed by a representative of His Majesty's government to insurgent authorities.

A. A. Magee, K.C., named president of Barclay's Bank (Canada) to replace the late Sir Robert Borden, was re-elected at the annual meeting. H. A. Stevenson was elected vice-president.

Two crows are the newest addition to the national zoo at Washington. Officials said they were put on exhibition for the benefit of city-bred children who may not know the origin of milk.

Emperor Haile Selassie is living "in poverty and cannot afford fire in any of the rooms of his modest home with the exception of the children's nursery," the London Sunday Referee said.

In the seven months ending Oct. 31, exports of Canadian products totalled \$670,037,800, compared with \$696,776,021 in the same period in 1936, the department of national revenues reports.

Mrs. Martin Johnson, for years her late husband's exploring partner, returned to New York from her first solo safari through the jungle and said she would go back next year, "to carry on Martin's work."

Gladstone creamery of Gladstone, Man., won the special award for the highest aggregate score in the three creamery butter sections at the Royal Winter Fair. Mrs. John Tait, of Meota, Sask., led the dairy butter, one-pound print class, with a score of 85.7 points.

A Good Bear Story

Hunter Was Surprised When Young Bruin Got Away

Charlie Walton, telegrapher in Lindsay, Ont., tells about a two-year-old bear which he had by the tail only to lose the animal.

After Charlie shot twice the bear started galloping around in a circle with Claire in the centre. The hunter had one bullet left. So Claire hid behind a tree and as the bear came around the corner he cracked it on the head with his rifle butt. Bruin fell in a crumpled heap.

It was evident its neck was dislocated. So Clair grabbed the animal by the tail to straighten it out. He heard a vertebrae snap back into place. He let go the tail and the bruin hopped away. The hunter was too surprised to shoot.

Self-shining shoes, made of leather impregnated with lubricants which are forced to the surface by the heat of the feet, have been perfected in a laboratory.

Floating rocks may be found in the rivers and streams of the Swiss Tyrol.

Looks Like Wasted Time

Science Has Succeeded In Making Cat Do Ridiculous Things

It looks very much as if science has finally solved the riddle of what happens when an irresistible force meets an immovable object. At Vanderbilt University an experimenter made a cat do what it did not want to do.

How wonderful is man in accomplishing a purpose of no possible benefit to anyone! For an electrical device deposited small hairlike electrodes on a spot exactly midway between the two sides of the feline cerebellum. All at once the innocent victim elevated both front legs and sat on its haunches. Next it stuck its tail straight up in the air, lifted both front legs and tried to stand on its forepaws.

No all-respecting cat—and they are all, all self-respecting—would commit so preposterous an action by its own will. Unlike men and dogs, the cat never makes one move except to gain a definite satisfaction—there must be a mouse or a salmon steak in it, or else it simply is no go. What cat ever copied a dog in trying to do sixteen useless things all at the same time?

What does science hope to accomplish by trying to meddle with a creature which cannot be improved? Rightly the cat knows itself as the greatest fighting machine and the most beautiful work of art in the world. Serenely to move within that charmed circle of perfection is the cat's personal and historic mission, and not all the scientists in the world are going to tell it any different. Despite abuse and laboratory experiments the lord of the house will continue to cast ironic glances upon the busybody—man.—Chicago Daily News.

Gift For Princess Elizabeth

Book Written By Canadian Woman Sent To Buckingham Palace

A Canadian woman's narrative of her childhood days among the Royal Canadian Mounted Police has found a place on the book-shelf of little Princess Elizabeth.

The story is "Susannah, a Little Girl with the Mounties," and the author is Mrs. Merrill Denison, formerly of Toronto.

Of all the uniformed detachments that took part in the coronation procession last May, the Mounted drew the special attention of the 11-year-old girl who may one day be Britain's queen. The princess later reviewed them.

Because of her interest in the mounted police, a copy of the Canadian woman's book was sent to Buckingham palace. Mrs. Denison had a letter from the queen's secretary saying Her Majesty was pleased to accept the volume for Elizabeth.

Mrs. Denison is the former Muriel Goggin, daughter of the late Dr. D. J. Goggin, who was the first superintendent of education in the Northwest Territories.

The story concerns her childhood in and near Regina. Part of her education was received in the mounties' barracks, then 3½ miles outside Regina proper. The tutor of the police commissioner's children often was tutor to little Muriel. The Goggin home was "open house" to the mounties.

SIMPLE LINES ARE SMART LINES IN THIS PRINCESS' FROCK

By Anne Adams

Very nearly the perfect frock as far as wearability, adaptability and smartness go! The beautifully simple lines give you that envied streamlined effect through the waist, ending in an ever so graceful flare at the hem! Take your choice of long, bracelet-length or short sleeves—then decide between three equally flattering necklines. Use of roll—as you please—the sparkling button accents—or the bit of contrasting ribbon piping at the V neck. Beginners will be delighted with Pattern 4596, and want to make it up in silk crepe, synthetic or novelty wool.

Pattern 4596 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 takes 3½ yards 39 inch fabric and ¾ yard trim. Illustrated step-by-step sewing instructions.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 115 McDermott Ave. E., Winnipeg.

MEDAL FOR "MERITORIOUS PUBLIC SERVICE"

Dr. John M. Craigie, director of the rust research laboratory, Winnipeg, was presented with the medal of the Professional Institute of the Civil Service of Canada at the annual convention of that body in Ottawa. The award was made in consequence of Dr. Craigie's work for the elimination of wheat rust. J. C. Beauchamp, president of the institute, making the presentation, declared he believed Dr. Craigie's work, and that of his collaborators, would come to rank with that of the late Sir Charles Saunders, discoverer of Marquis wheat. It would save western farmers in the neighborhood of \$25,000,000 annually.

AGAINST PLACING COLONIAL DEMAND BEFORE LEAGUE

London.—The Earl of Plymouth, under-secretary for foreign affairs, told the house of lords there were "serious objections" at present to placing Germany's colonial demands before the League of Nations.

Lord Plymouth spoke in answer to a proposal Chancellor Hitler's demands for restoration of Germany's pre-war colonies be examined within the framework of the League of Nations and the Kellogg-Briand pact.

Lord Plymouth recalled Prime Minister Chamberlain's statement that informal discussion was preferable to public declaration as a means of improving the international understanding. "We intend to strive as hard as we can to bring about a general appeasement throughout Europe and the world," Lord Plymouth said. "The prime minister has indicated to us the method in which this is best approached."

Declaring colonies would be the dominant issue in any settlement with Germany, Lord Allen of Hurwood, Labor, expressed hope the question would not be allowed to become "a festering sore on the body politic of Europe like reparations before it."

He favored establishment in Africa of an "open door," but with two stipulations: First, those signing the agreement must join the league and, second, they must limit their armaments.

Lord Allen warned Germany was dangerous in her present "psychological mood" and urged no single act at the present moment could do more to prevent war and strengthen peace than an Anglo-German rapprochement.

Replying for the government, Lord Plymouth declared the government's objective continued to be a comprehensive settlement.

"The grave difficulties and problems at present troubling the world depend very largely the one upon the other," he said. "We are well aware that it is only infrequently that any one of them can be solved in isolation from the rest."

Would Waive Rights

Ottawa Ready To Assist Federal Unemployment Insurance Plan

Sault Ste. Marie, Ont.—Premier Hepburn declared in an address here Ontario was ready "to waive any constitutional rights which may be involved in order to assist in establishing unemployment insurance on a nation-wide scale."

The Ontario government "welcomes the gestures of the federal government with regard to unemployment insurance," he said in his first public comment on Prime Minister Mackenzie King's letter asking the provinces to join in a federal unemployment insurance program.

His government was already committed to a plan of unemployment insurance, the premier continued, and was anxious to assist Premier Mackenzie King in whatever the federal government planned in the insurance scheme.

To Promote Peace

Toronto.—While Japanese militarists were planning war, Japanese children had been collecting money to give to the International Peace Garden on the Manitoba-United States boundary, H. J. Moore, Ixington, Ont., told the 10th biennial meeting of the board of the Federated Women's Institutes of Canada here.

Nutrition Council Formed
Ottawa.—A National Council of Nutrition in Canada was announced by Health Minister Power. It will have a membership of possibly 25 under the chairmanship of Dr. R. E. Wedemeyer, deputy minister of the department, and will include representatives from 17 national administrative branches or voluntary organizations.

New Trade Agreement
Ottawa.—A trade agreement between Canada and the Central American republic of El Salvador, granting mutual most-favored-nation tariffs, has been announced by Trade Minister W. D. Euler. It came into operation Nov. 17.

History Of Great War

Book May Be Published In Canada Early Next Year

Ottawa.—Proofs of the first volume of Canada's official history of the Great War are being read now, it has been learned. Preparations are complete for appearance of the volume early in 1938.

Editorial criticism has been directed recently against the delay in issuing the work, undertaken by Col. A. Fortescue Duguid, director of the historical section of the defence department.

The first volume embraces the war from its outbreak up to and including the second battle of Ypres, in April, 1915. Subsequent volumes cover Canadian operations within definite periods.

The historical section was assigned to the task of writing the history nearly 17 years ago, but, although a vast amount of material was accumulated and Canada's participation in the war is well documented, little progress has been made. About 12 years ago Sir Andrew Macphail wrote the history of the Canadian medical services, to be included as a section of the larger work. Since then the writing of the main story has languished.

Loses Wheat Title

Herman Trelle Fails To Take First Place At Winter Fair

Wembley, Alta., four times winner of the bley, Alta., four times winner of the world's wheat king title at the Chicago International fair, failed to win first place in spring wheat competition at the Royal Winter fair, officials announced. Trelle's customary place at the top of the class was taken by a Wembley neighbor, Fred Paverty. The competition, limited to grain grown west of Fort William but still symbolic of Canadian supremacy, attracted a near-record entry. Paverty displayed Reward wheat while Trelle's entry, which placed second, was Marquis, H. G. Neufeld of Codette, Sask., was third.

In previous years Trelle displayed Reward wheat but this year switched to Marquis' out of respect for the late Sir Charles Saunders, developer of the Marquis variety.

In a letter to the seed committee of the fair, Trelle said he was displaying Marquis instead of Reward because "it seemed only fitting as a mark of respect to the late Sir Charles Saunders."

Job Still Unfilled

Ottawa Wanted General Executive Assistant For Finance Department

Ottawa.—The finance department cannot find a qualified Canadian willing to take a job at \$5,400 a year.

The department several months ago began seeking a general executive assistant. A number of men tried the civil service examination. All failed. To pass and the department has abandoned further efforts to fill the job. The requirements called for university education with stress on economics and at least five years' experience in financial work.

WINS FIRST MEDAL

Dr. J. H. Craigie, of the Dominion Rust Research Laboratory at Winnipeg, winner of the first medal awarded by the Professional Institute of the Civil Service of Canada, for his work in connection with solving the problem of grain rust.

London To Cap Record

Fliers Beat Amy Mollison's Time By Over 33 Hours

Capetown.—Bringing their plane to earth here amid cheering crowds, Flying Officer A. E. Clouston and Mrs. Betty Kirby-Green set a new record for the flight from London of 45 hours and five minutes.

Their speedy trip brought them to the Cape 38 hours and 24 minutes ahead of the time taken by Mrs. Amy Johnson Mollison on her record flight of May, 1936.

Other marks they set on their meteoric progress from Croydon airport, were the London-Cairo record and the London-Johannesburg mark.

A delighted trip pressed close to their machine as soon as it came to rest. The flyers gaily acknowledged the cheers and neither appeared unduly tired although they have had practically no rest on the ground in the last two days.

"Thanks very much, but please don't damage the machine," Clouston warned the crowd smilingly. "We want to go back to London in it."

Spanish War Halted

Winter Weather Paralyzes Military Action On War Fronts

Hendaye.—Winter weather paralyzed military action on Spanish war fronts. Neither side reported any fighting.

Observers believed the advent of winter would prove a major obstacle to insurgent General Franco's campaign for an early end to the conflict. Advances reaching the frontier said heavy fog hung over the opposing armies.

Bank of Canada Dividend

Ottawa.—The Bank of Canada's half-yearly dividend of \$1.13 a share on its capital stock, is payable on and after January 5, 1938, to shareholders of record at the close of business November 30, 1937.

Riding Ice Floe

Arctic Campers Drift 400 Miles From North Pole

Moscow.—Four Russian Arctic campers, riding an ice floe down from the North Pole, reported by wireless they were only 125 miles off the northeastern coast of Greenland.

In Moscow, Dr. Otto Schmidt, leader of the aerial expedition that established the camp 13 miles from the pole nearly six months ago, said the four men probably would be taken off in January before their ice raft reached open sea and danger of breaking up.

The campers had drifted more than 400 miles. Now that the direction of the Polar drift is known, Dr. Schmidt said, Soviet scientists were planning to fly two and possibly three sets of campers to the far side of the pole and let them drift across it about 200 miles apart.

Ernest Krenkel, camp wireless operator, broadcast a description of life in the ice floe hut. He said it looked like a sugar-coated cake, surrounded by ice hummocks and snowdrifts.

Canada's Death Toll

Lowest Death Rate In Dominion Shown For Saskatchewan

Ottawa.—Canada's 1936 death toll was 106,617, according to preliminary figures published in the annual report of the national health department. This represented a ratio of 8.7 per thousand of population.

The highest rate was in Prince Edward Island, 11.1, and the lowest in Saskatchewan, 6.7.

The maritime provinces throughout showed the highest death rate, with 11 for Brunswick and 10.7 for Nova Scotia. The lowest throughout was the prairie provinces, where Alberta's rate was 7.7 and that of Manitoba, 8.7.

In British Columbia the rate was 9.6. The two central provinces ran fairly parallel, 10.2 in Ontario and 10.3 in Quebec.

Deaths from cancer increased from 11,156 in 1925 to 11,652. In Ontario the deaths numbered 4,438 and in Quebec 2,938. Tuberculosis accounted for 6,745 deaths, and all forms of pneumonia, 7,266. Fatalities from motor accidents numbered 1,277.

Meeting In Camera

No Announcements From Radio Commission Until Sessions Finished

Ottawa.—Board of governors of the Canadian Broadcasting Corporation said no further announcements would be forthcoming from their conference until its end. Meanwhile sessions will be held in camera.

The governors heard a joint representation from the Lord's Day Alliance of Canada and the Ligue du Dimanche urging Sunday radio advertising should be restricted to bare announcement of the program sponsor's name.

The delegation asked also that commercial sport programs and broadcasts of professional sports be prohibited on Sundays.

JAPANESE THREAT TO PREVENT AID GOING TO CHINA

Brussels.—Dr. Wellington Koo, China's chief delegate at the Brussels conference, interpreted a Japanese threat of a blockade as an attempt to scare the conference powers away from any material help to China.

Japanese quarters warned any decision by the conference to fill Dr. Koo's appeal for material aid in the far eastern conflict would be regarded by Tokyo as a hostile act by the countries concerned.

A highly-placed Japanese declared Japan would have to exercise her "right under international law" to blockade the Chinese coast should the conference decide to send supplies to China.

"It is a bare-faced threat characteristic of the temper of the aggressor," Dr. Koo declared. "It remains to be seen whether the powers represented at the conference will accept dictation from Japan as to what policy they should follow in China."

Japanese sources expressed resentment at what they asserted was a "false impression" given to the world that 15 of the 19 conferring powers had voted for a declaration which criticized Japan.

Italy voted against the declaration and Norway, Sweden and Denmark abstained when the declaration was adopted after Japan's second rejection of an invitation to join the conference. Great Britain, these sources declared, cast six of the 15 votes through her dominions, Canada, Australia, South Africa, India and New Zealand.

Plot Against Nation

French Authorities Make Arrests And Seize War Material

Paris.—The secret hooded society known as La Cagoule, was the object of a nation-wide police investigation as legal proceedings, begun at Dieppe on the charge of plotting against the nation's security.

What officials had at first been inclined to dismiss as a hoax was viewed with increasing gravity after six arrests revealed a well-organized and equipped military machine.

Enough explosives to blow up a section of Paris, anti-aircraft weapons, machine guns, huge ammunition stocks, ambulances and stretchers, all cached in subterranean chambers, were among the contraband material seized in alleged Cagoulard arsenals.

Those arrested were Rene Anceux, a wealthy Dieppe contractor; Gaston Jussereau, proprietor of an apparently sleepy little family boarding house, which inquiry proved to be honeycombed with underground passages concealing great stores of explosives and munitions; Robert de la Motte de St. Pierre, a well-to-do young Parisian; and Fernand Jakubiez, Joseph Vasselin and Louis Mollicone.

Evidence gathered by police was turned over to Examining Magistrate Betteille at Dieppe. He issued a large number of warrants and new arrests were expected.

Japanese Activity At Coast

Not A New Subject, Says Defence Minister Mackenzie

Victoria.—Defence Minister Mackenzie said that the subject of Japanese activity on the Canadian Pacific coast was "not a new one to my department."

The minister, commenting on a despatch from Toronto in which Archbishop F. G. Scott was quoted as saying Japanese naval officers in disguise were living in British Columbia coastal villages, said his department was kept informed upon all matters affecting Canada's safety.

"We have an intelligence service and it is well-informed upon all matters affecting the safety and well-being of the country," the minister said.

"If private citizens have information of importance to the defence of their country, I think it is their duty to furnish it to the day and well-being of the country. It will be cordially welcomed."

WORKING TO SOLVE GRAIN RUST PROBLEM

The staff of the Dominion Rust Research Laboratory at Winnipeg, with Dr. Buller (centre front) who, as Professor of Botany in the University of Manitoba, did a great deal of pioneer work to stimulate interest in the rust problem.

Front row (left to right)—B. Peterson, Dr. W. F. Hanna, Dr. Margaret Newton, Dr. A. H. R. Buller, Dr. J. H. Craigie, Dr. C. H. Gouden. Middle Row—Dr. E. P. Peterson, W. H. Waddell, Dr. F. Johnson, A. M. Brown (partly in front of Dr. Johnson), W. Popp. Back Row—J. N. Welch, Dr. P. J. Greaney, Dr. J. E. MacEachern, W. A. F. Hagborg.

The World of Wheat.

By H. G. L. Strange, Director Research Department,
Seattle Grain Co. Ltd.

"What is the reason No. 3 Northern is at
such a discount in price compared with No. 1
and No. 2?" friends ask me.

"There is a misunderstanding here", I
answered. "No. 3 Northern, far from being
at a discount, is actually selling at quite a
premium on world's markets, as compared
with wheats of equal quality".

On the Liverpool market, No. 3 Northern
is commanding five and one half cents over
Australian, 11 cents over Indian, 16 cents over
American Hard Red Winters, and 16 cents
over Argentine wheats; demonstrating that
No. 3 Northern is definitely at a premium.

We are confused, however, by the much
higher premiums that are bid on world's mar-
ket for No. 1 and No. 2 Northern, the reason be-
ing that Nos. 1 and 2 are much more scarce
than No. 3.

Actually, therefore, we see in front of us a
revealing moving-picture of the Law of Supply
and Demand in action thru the medium of the
open "futures" market. We see 3 scarce ar-
ticles with eager bidding for them by Canadian

A Farm Seed Field

"A Seed Field on the Farm" is the title

and British millers, all resulting in a benefit to
our producers.

The different premiums for Nos. 1, 2 and 3
Northern paid on world markets are reflected
straight back to our Canadian producers in the
prices offered at country elevators.

The following factors have tended to raise
prices: Rate of world shipments in excess of
Broomhall's estimate; Germany and England
actively buy Argentine corn; conflict in East
becomes more serious; Japanese rice crop small-
er than last year; signs of black rust in Argen-
tine; flooding causes crop deterioration in Italy.

Following factors have tended to lower
prices: Austrian wheat crop larger than last
year; Competition from cheap Danubian wheat;
Canada importing South African corn; business
reversal in USA; German potato crop largest
on record; Manchurian soy bean crop above
last year; Rains improve Argentine crop pros-
pects.

BUTTER AND EGGS WANTED AT The Royal Cafe.

McLaughlin--Ross.

At a quiet ceremony at the Archbishop's Palace, in Edmonton, Rev E Q Jennings solemnised the marriage of Miss Helen Margaret, daughter of Mrs M Ross to Mr John H McLaughlin, of Spruce Grove, on Monday, November 15. The bride wore a traveling costume of rose-beige crepe, a brown hat and corsage of roses. Miss Betty Ross, sister to the bride, was bridesmaid. Mr Gordon Elrick of Edmonton was best man. On the return from their honeymoon they will take up their residence on the McLaughlin Farm, just west of Spruce Grove.

Mr McLaughlin is a graduate of the University of Alberta. He received the degrees of bachelor of science and bachelor of arts in 1927.

Practical Philanthropy.

Carloads of fruit, potatoes and vegetables from communities thruout Canada have been rushed across country to drouth-stricken districts of Saskatchewan. Up to August 27th the number received by Saskatchewan Voluntary Relief Committee was 693, including six from northwestern Saskatchewan. Carloads forwarded from the other provinces were: Ontario 264, Manitoba 185, B. C. 119, Alberta 31, Q.N. B. 29, Quebec 26, N.S. 20, P.E.I. 13.

While Ontario may take justifiable satisfaction in heading the list, says The Toronto Star, it is inspiring to find Alberta, with 40 municipalities of her own requiring assistance, sending 31 caas of vegetables to her neighbor. It is inspiring, too, to realise that clergymen of all denominations have worked harmoniously together in the promotion of this fine piece of practical philanthropy.

Joe Smigelski Freed.

Jos. Smigelski, the Blueberry district farmer, was acquitted by Mr Justice Tweedie in Supreme Court last week on charges of theft of a horse and harness valued at \$120 from Mike Stenorchuk, the Gunn homesteader. The thefts allegedly were committed on May 4th.

Taylor vs. Griesbach.

Resignation from his seat in the Senate is not contemplated by the Hon W A Griesbach, despite the demand that he do so received from G D Taylor, President of the Stony Plain Constituency Association of the Social Credit League.

In his reply to Mr Taylor, Senator Griesbach wrote, advising that "I shall continue to exercise my rights as a citizen of this province in attacking any Government or political party, who in my judgment are deserving of opposition and criticism."

Social Crediters are said to have claimed the Senator's "actions and speeches" recently should justify his resignation from the Senate.

[The Sun has been given to understand that the letter from Taylor to Griesbach was in the nature of a resolution passed at a Social Credit convention held recently in Stony Plain.]
